

## Plast Camp Registration

### Пластова Таборова Реєстрація

#### Frequently Asked Questions (FAQs)/Типічні Питання

##### **What is CampDoc?**

CampDoc is a leading electronic health record system for camps. This is where you will register your child for camp and will input your child/children's medical records as well as upload medical forms necessary for camp.

##### **Що є CampDoc?**

CampDoc є електронна система на реєстрацію. Це є як Ви зареєструєте ваших дітей на табір і де заповнити ваших дітей медичні інформації та долучите лікарські документи та записи про щеплення.

##### **How do I register my child for camp in CampDoc?**

This year, all Plast camp registrations will be handled through CampDoc - <http://app.campdoc.com/register/plastusa>. Those that used CampDoc last year should log into their existing profile. **Do not create a new profile.** Parents will need to complete an initial registration application for their children online by clicking on "Registration" and choosing the camp they want and completing the first few required items. Once accepted into camp, parents will be notified to proceed with the rest of the registration process. All registration applications are due by **May 1<sup>st</sup>**.

##### **Як зареєструвати мою дитину якщо я новий/нова до CampDoc?**

Цього року всі окружні Пластові табори будуть вживати електронну платформу CampDoc на таборову реєстрацію - <http://app.campdoc.com/register/plastusa>. Ті що вживали CampDoc минулого року повинні увійти в їхній профайл. **Прошу не відкривайте новий.** Батьки повинні спочатку вповнити аплікацію на табір через CampDoc. Треба потиснути на "Registration" і вибрати на який табір ви хочете вислати дитину. Коли дитина буде прийнята, тоді батьки зможуть закінчити решта реєстрації на платформі. Всі аплікації треба вповнити до **1 травня**.

**Why is there an Application process?** This is because the Stanytsi need to confirm that the child has permission to attend camp. They need to confirm that the child is in fact a member of their stanytsi, paid their membership dues and are active members in Plast activities during the year.

**Для чого є ця аплікація?** Вона є створена, тому що усі станиці спочатку повинні дати дозвіл дитині їхати на табір. Вони підтвердять, що дитина є членом станиці, заплатила вкладку і бере активну участь в пластовій програмі під час року.

Once your child is “accepted” to camp, parents will be notified to proceed with the remaining required items in the Health Profile. All medical information and form will once again be submitted through CampDoc. **The CampDoc Health Profile and medical forms must be completed and uploaded in the platform by sent by June 1st**

Коли дитина буде прийнята, тоді батьків буде повідомлено і вони будуть зобов’язані закінчити решта реєстрації на платформі. Всі медичні форми будуть здані і виповнені електронно на платформі CampDoc. Так як згадано зверху, **Всі медичні форми і Health Profile мусять бути здані на CampDoc до 1-го ЧЕРВНЯ.**

### **Medications**

---

**Please be sure to list any medications taken, including any medications that will NOT be needed while at camp. If a medication will NOT be taken during camp, please indicate why not in the Special Instructions box.**

## Over the Counter Medications

- i** The following non-prescription medications may be stocked in the camp Health Center and are used on an as-needed basis to manage illness and injury. Select No for any medications the camper should not be given.

 <b>Over the Counter Medications</b>	The “Over the Counter Medications” section is complete. Move onto the next section by either clicking on the next section or clicking the “next step” button the bottom right of the screen.
 <b>Health History</b>	The “Health History” section is not complete. Go back to this section and ensure all required fields are filled out.

### **I am trying to add an allergy/medication that my child takes but it is not listed as an option. What should I do?**

The Allergy/Medication section will accept free-text. CampDoc attempts to help you by showing you a list of medications but free-text is acceptable. This is also true for the medication strength.

### **Я пробую додати алергію або лікарство але воно не є на списку. Що я повинен зробити?**

В системі можна додати ліки чи алергії які не є в системі. CampDoc пробує допомогти вам зі списками типічних ліків і алергіїв але можна вписати що небудь вам треба якщо ви не зможете знайти те, що вам потрібно.

#### **New Environmental Allergy**

\* Allergic to...

- Animal Dander, Horse
- Bee / Wasp Sting
- Insect Bite
- Seasonal

**\*\*Attention\*\* - For Daily Medication - Please avoid oral suspension medications (liquids) when possible. Please request chewable medications and/or tablets/capsules from your prescriber. In addition, when appropriate, please choose only “after breakfast” and “after dinner” for medication administration times. Although the infirmary can administer medications at different times based on specific needs, these are our preferred medication administration times.**

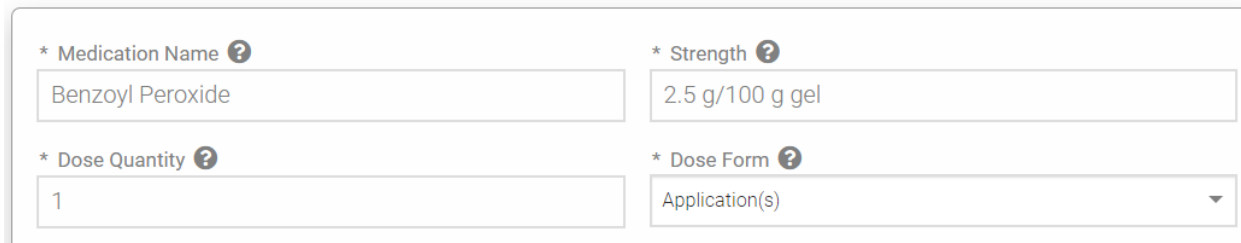

**\*\*Увага\*\* - На Дені Ліки – Прошу попросіть лікарів за таблетки замість плінні ліки де можливо. Це допомагає медичні дружині та таборі зі адміністрацією ліків. Також якщо можливо, прошу вибрати “after breakfast/по сніданку” або “after dinner/по вечері” коли виконуєте часи на адміністрацію ліків. Шпиталик може видавати ліки в інакші часи але ці два часи є найбільш зручні для табору.**

**I am confused about how to add a topical cream/lotion/ointment/foam to my child’s medication list. What is “Dose Form”?**

You can use “application(s)” for the “dose form” of a medication that goes on the skin.

**Я не розумію як додати крем до медичного списку. Що є “Dose Form”?**

Можна додати “application(s)” на “dose form” чи кількість на всі лікарства на шкіру.

The screenshot shows a form with four input fields arranged in a 2x2 grid. Each field has a red asterisk and a question mark icon. The top-left field is labeled '\* Medication Name' and contains the text 'Benzoyl Peroxide'. The top-right field is labeled '\* Strength' and contains '2.5 g/100 g gel'. The bottom-left field is labeled '\* Dose Quantity' and contains the number '1'. The bottom-right field is labeled '\* Dose Form' and is a dropdown menu with 'Application(s)' selected and a downward arrow on the right.

**Why do I need to manually add Immunizations when I’m uploading my child/children’s immunization form?**

To be in compliance with NYSDOH Children’s Camp Safety Plan, we must be able to quickly identify campers and staff who are not fully vaccinated or have natural immunity to a vaccine preventable disease. For this reason, we ask you to manually add immunizations and their dates of administration. We understand this is time consuming but thank you for your help in keeping campers safe. We have reduced the list of “required” immunizations (in red) to help ease this burden on parents, but we strongly urge parents to document all immunizations listed on your child’s vaccine administration record.

**Чому я мушу вписати інформацію про моєї дитини імунізації?**

Щоби бути поступливим з NYSDOH Дитячим Таборовим Плянком Безпеки нам потрібно швидко ідентифікувати хто із таборовиків чи булави не є імунізований від хворіб яким можна запобігти вакциною. Через це, просимо вписати інформацію про щеплення і подати дати коли їх одержали на платформі. Ми розуміємо що це може вимагати багато вашого часу але дякуємо за поміч підтримання безпеки таборовиків. Ми зменшили список вимагаючих імунізацій (в червоному) але просимо все виповнити якщо можливо.

**Why do I need to provide a reason my child has not been immunized against certain vaccine diseases in CampDoc?**

If your child is not immunized against certain vaccines, the camp health inspector requires a written statement as to the reason why. Examples may include; religious beliefs, immunosuppressive medications, immune disorder, serologic immunity, medical condition, allergies, etc. In the event that your child has received some doses of a vaccine but not all in the series based on the CDC recommended vaccine schedule, you can fill out the dates of the doses they have received and then check off “not received” for the doses not received yet. In the description you can type “not due based on schedule”.

**Чому я мушу пояснити чому моя дитина не дістала деякі імунізації в CampDoc?**

Якщо ваша дитина не дістала якісь щеплення, таборовий медичний інспектор вимагає причину. Причини можуть бути - релігійні переконання, імуносупресивні лікарства, імунні порушення, серологічний імунітет, стан здоров’я, алергії т.п. Якщо ваша дитина одержала деякі щеплення зі серії але не всі (мабуть через вік), можна виповнити дату одержання тих що вони дістали, і потиснути “not received” для тих що ще не отримали. В поясненні можна написати “not due based on schedule”.

### Haemophilus influenzae type B (Hib)

Dose 1     Not received

Dose 2     Not received

\* Why has this not been received?

Not due based on schedule (not old enough yet).

Dose 3     Not received

\* Why has this not been received?

Not due based on schedule (not old enough yet).

Dose 4     Not received

\* Why has this not been received?

Not due based on schedule (not old enough yet).
